

Thank you for purchasing Quinn's Witch Hazel Toner with Cucumber and Mint. We hope that you love the soothing cucumber and mint fragrance as much as we do.

Witch hazel, aloe vera, cucumber and mint are plant-based substances that have been used to soothe a variety of skin irritations for centuries. Quinn's Witch Hazel Toner can be used on sensitive, dry, oily and combination skin, both on the face and body.

QUINN'S WITCH HAZEL TONER CAN ASSIST WITH THE FOLLOWING SKIN CONDITIONS:

ACNE CONTROL

The natural astringent in witch hazel may help with the control of acne by removing excess oil from the skin, reducing inflammation and accelerating the healing process. Regular use may reduce the amount and severity of blemishes, especially black heads which result from a buildup of sebum in the pores.

For cleaner softer skin, wash the face or affected area before application and apply with a soft washcloth once daily. Treatment is for external use only, do not use on open sores. Keep away from eyes.

PUFFY EYES

Witch hazel is the ideal natural remedy for helping to tighten the skin and treat puffiness under and around the eyes. Cover cotton pads with witch hazel, remove excess liquid and place over closed eyes for five minutes. Be careful to keep the product out of your eyes as it will sting.

VARICOSE VEINS

Witch hazel's astringent action can help to constrict blood vessels and provide temporary relief from the discomfort of varicose and spider veins. Soak a cloth in witch hazel and apply for five minutes daily to affected area. For maximum effectiveness, elevate the area you are treating.

BRUISES

The tannins in witch hazel can help to reduce the appearance and swelling of a bruise. To accelerate the healing process, soak a cloth in witch hazel and gently apply to your bruise several times a day.

SKIN REFRESHER

To clean and clarify your skin of residue or heat, apply witch hazel with a cotton ball after cleansing or anytime during the day as a softening refresher.

MOISTURIZER

Witch hazel removes oil and impurities from your skin but it won't dry it out like most astringents. The natural moisturizing properties will keep your skin smooth and nourished and the antioxidants will help to combat free radicals to protect against DNA damage.

Dab your skin with Quinn's after showering to seal in moisture and maintain skin softness and elasticity.

RAZOR BURN

The anti-inflammatory properties of witch hazel will help prevent those itchy red bumps from forming around irritated hair follicles. Suitable for ladies and gents, apply to skin with a cotton pad before or after shaving.

SUNBURN

To help soothe the redness and swelling of sunburn, soak a soft cloth in witch hazel and gently apply to affected skin. The anti-inflammatory power of the witch hazel will aid healing and the aloe will help to cool the burn. This treatment can also help to prevent skin from peeling and flaking in the days following the burn. Repeating the process will keep your skin nourished until fully healed.

ECZEMA AND PSORIASIS

Witch hazel contains natural anti-irritant and anti-inflammatory properties that make it a wonderful natural remedy to relieve the symptoms of chronic skin conditions such as eczema, psoriasis, chaffing and rashes. Gently dab on affected area with a cotton ball to ease pain, itching and redness.
